Indexing big colored image bank : Texture 3.0

Etienne CAILLAUD, Thomas LE BRIS, Ibrahima GUEYE, Gaetan ADIER

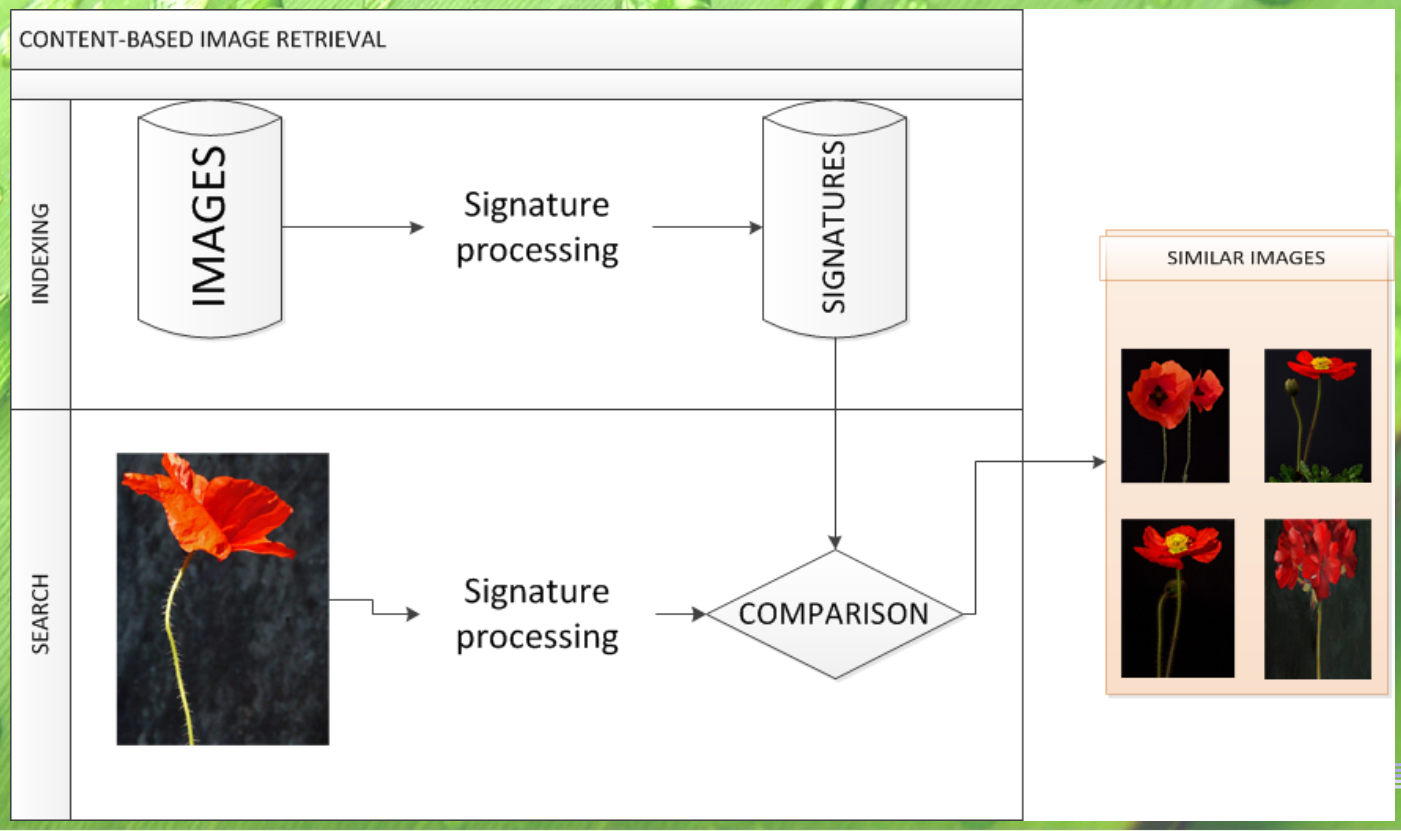
XLIM-SIC Laboratory UMR CNRS 7252, Poitiers, France

Outline

Project context (1/3)

Objective

Test a solution for content based image indexing flaw : standard descriptors (SIFT, SURF, etc) lacking real color and texture information.



Project context 2/3

What is a descriptor ?

Algorithm applied to an image which output is a short vector of numbers which is invariant to common image transformations and can be compared with other descriptors in a database.

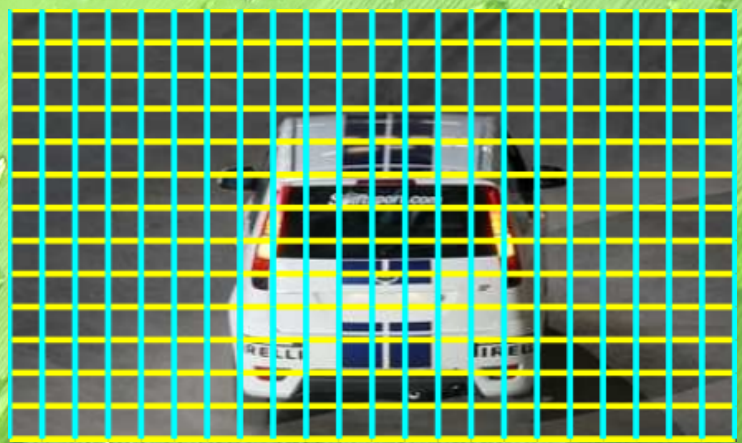


FIGURE: Densegrid

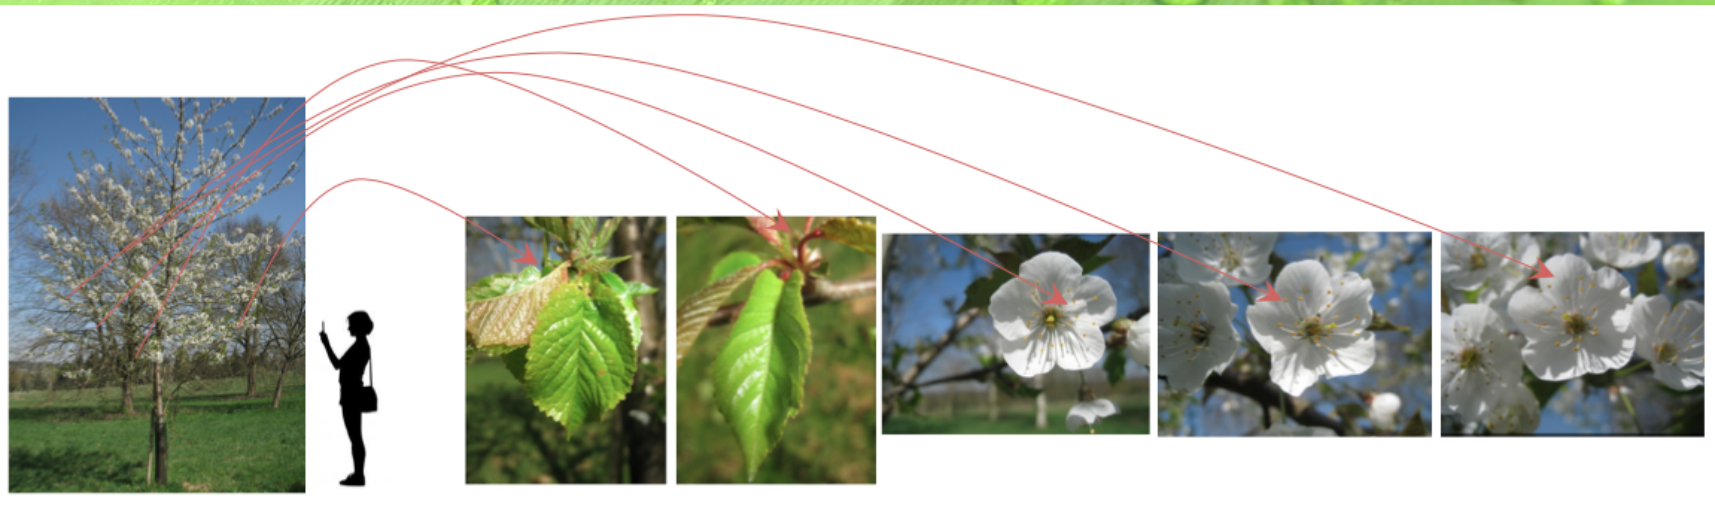
FIGURE: Interest points

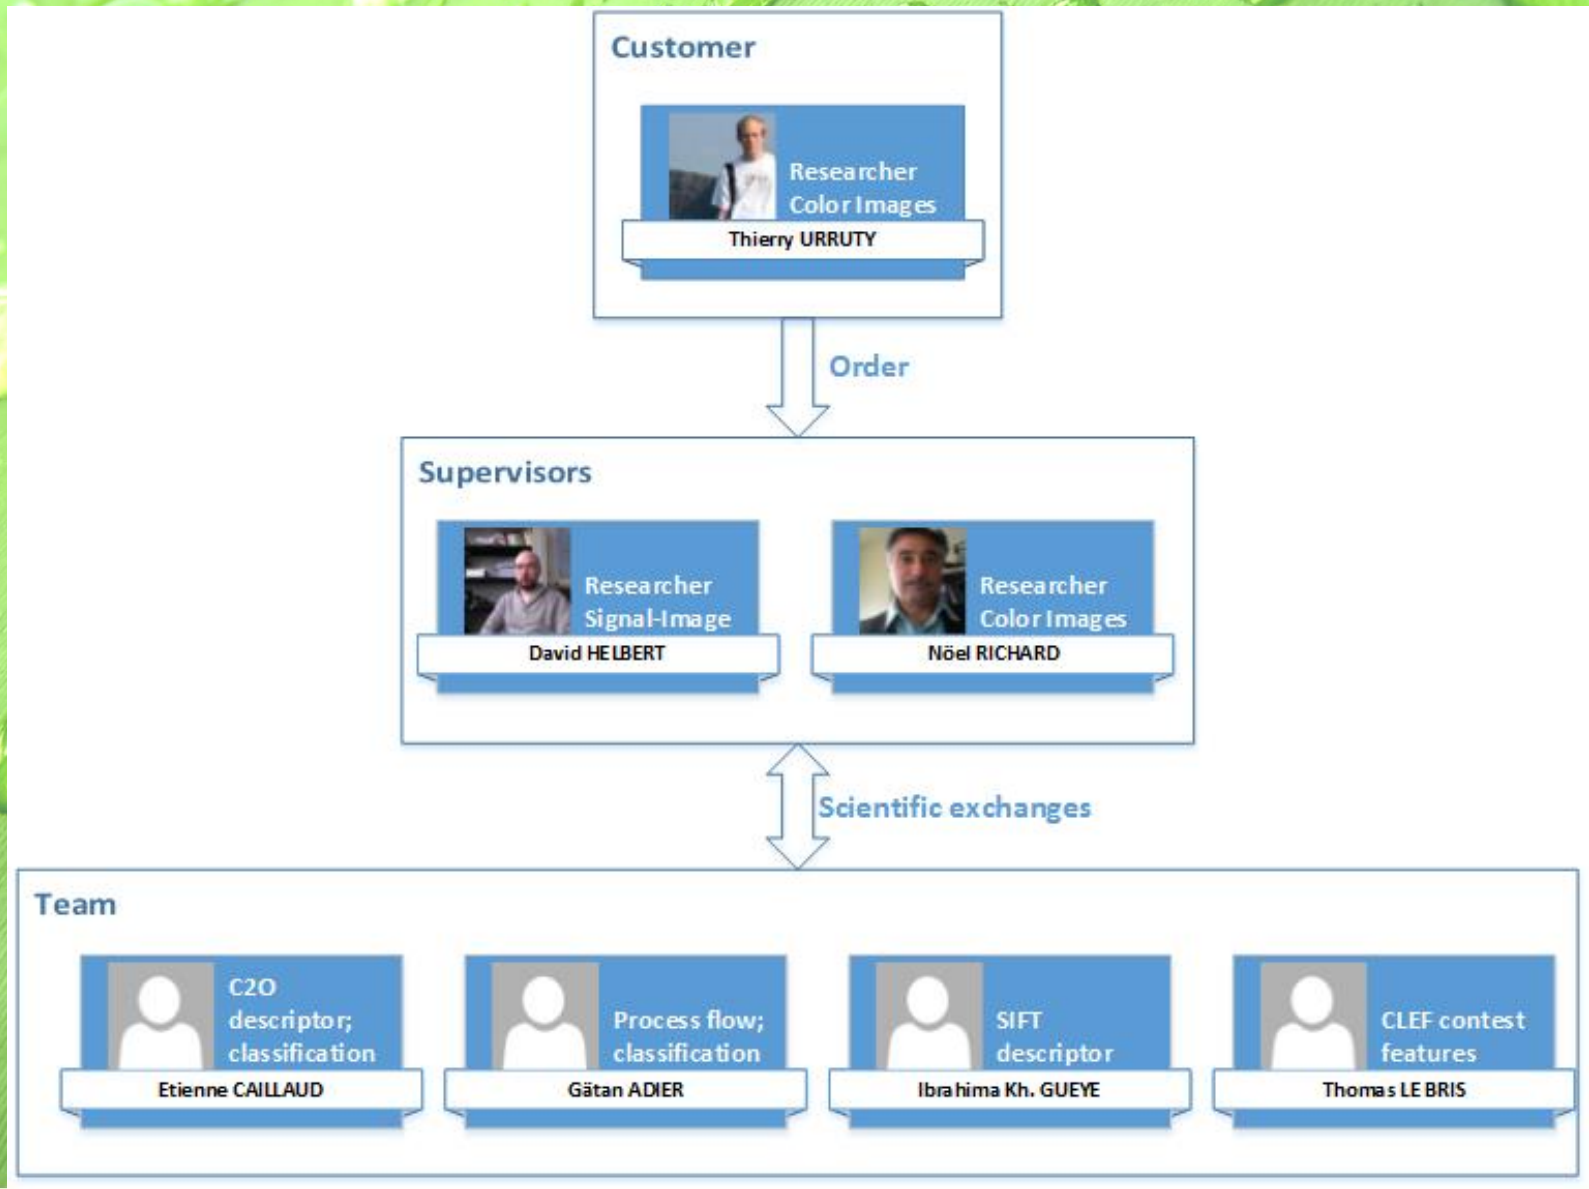
Project context 3/3

What is a CLEF ?

International contest which purpose is to provide a place where labs and companies solution for multimedia analysis of life can compete against each other.



Team presentation



User requirement

- Design software programs :
  indexation of images database,calculate descriptor according to nature images
- Adapt the last up to date designed color and texture attributes to the current image classification
- Compare our results (using CLEF challenge metrics)
- Provide an abstract of the comparisons and a technical report

Outline

SIFT(1/2)

Key-points detection (x,y,σ)

- Scale-space extrema detection
- Key-point location
- Orientation assignment
- key-point descriptor

SIFT(2/2)

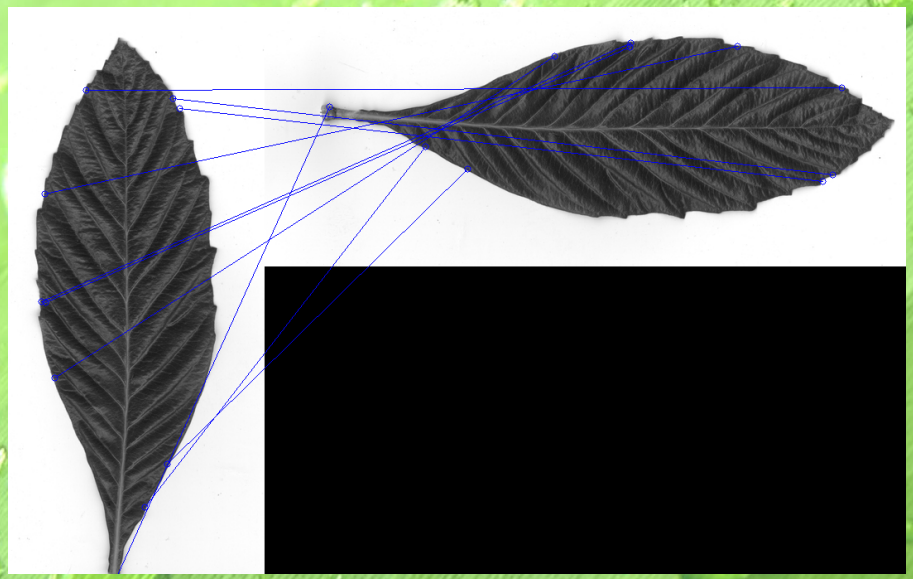


FIGURE: SIFT test1

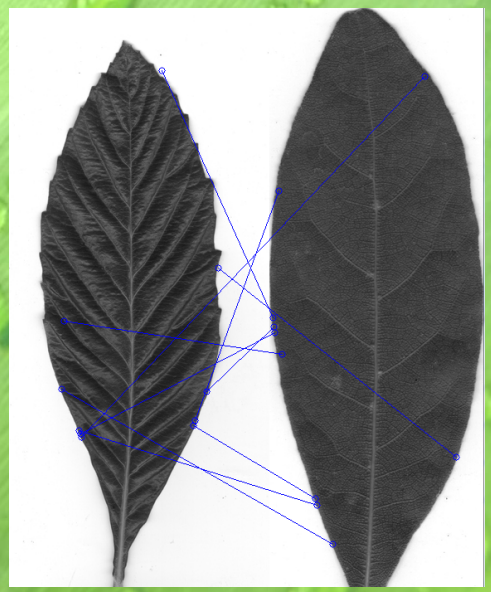

FIGURE: SIFT test2

C_2O (1/4)

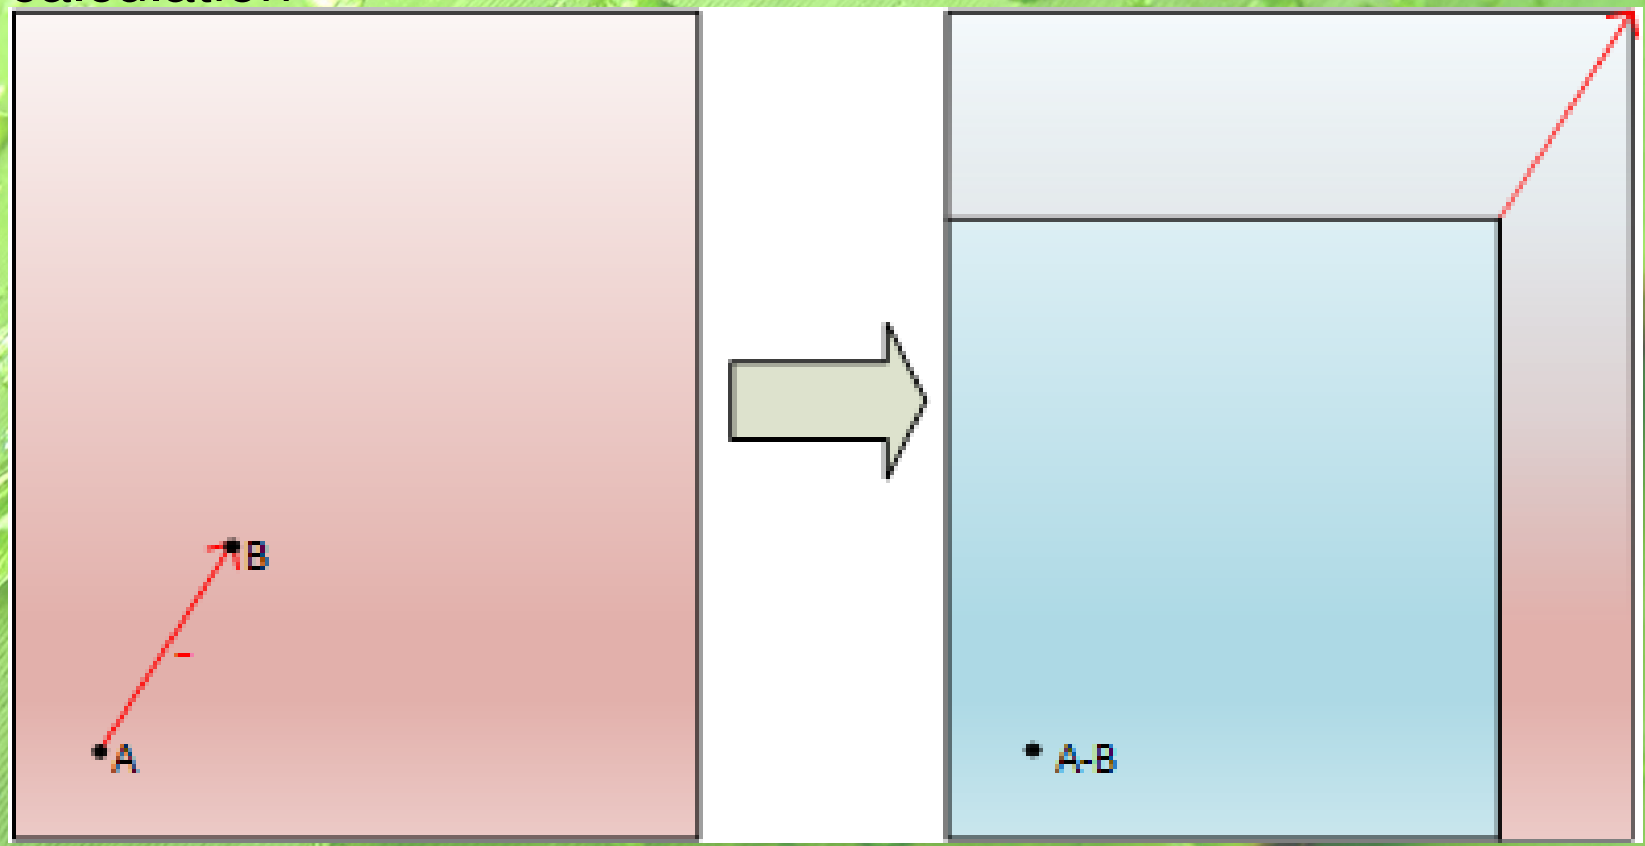
- Limitation of marginal approach
- Necessity to get a vectorial treatment
- Include better texture and color informations

C_2O (2/4)

- Conversion to a perceptual space (adapted to human perception).
- C_2O matrix calculation.
- C_2O signature extraction.

C_2O (3/4)

- Computation of the C_2O matrix by the color difference calculation



C_2O (3/4)

- The C_2O matrix for a poorly textured image :

FIGURE: Image to characterize

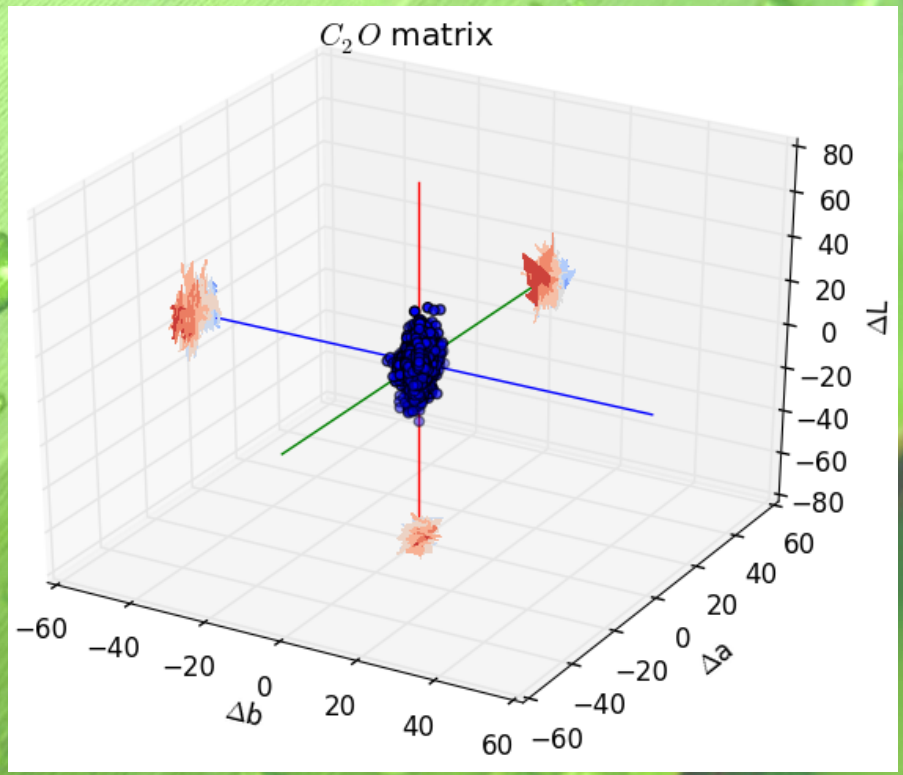


FIGURE: Signature

C_2O (3/4)

- The C_2O matrix for a poorly textured image :
- The C_2O matrix for a more textured image :

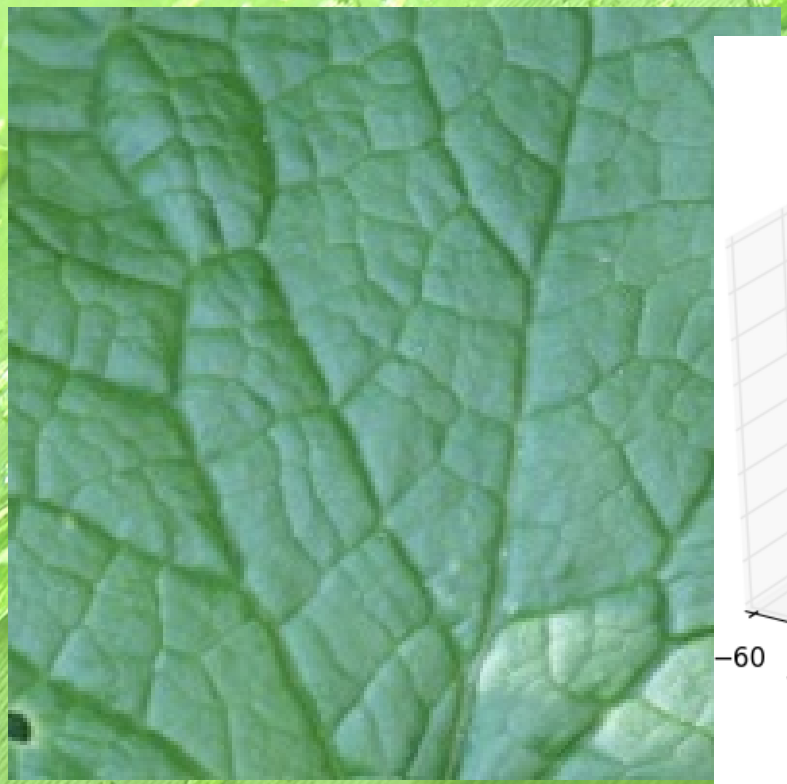

FIGURE: Image to characterize

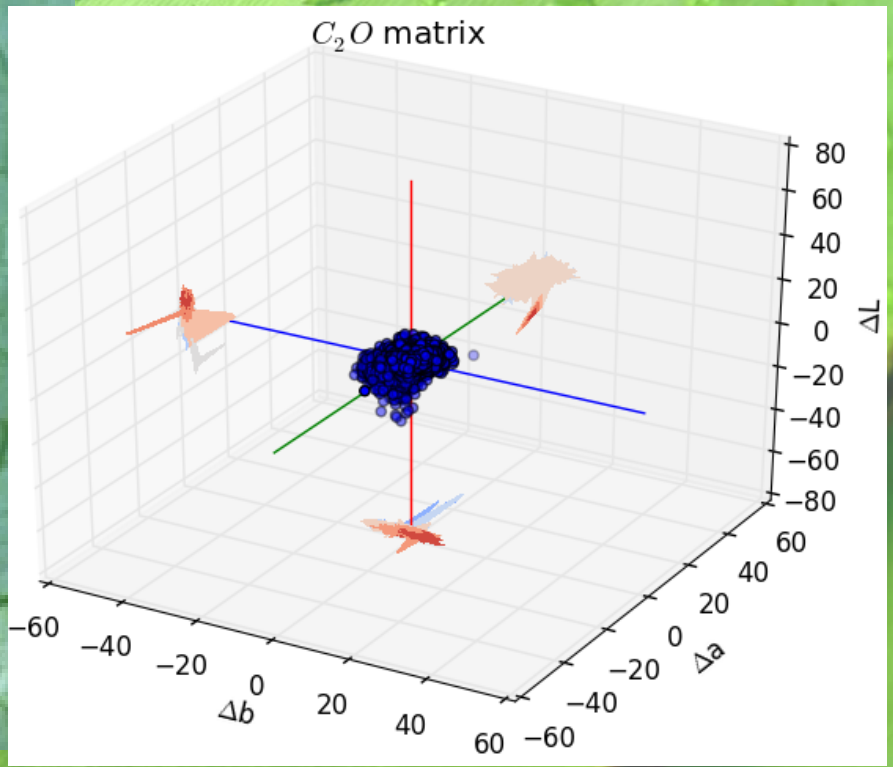

FIGURE: Signature

C_2O (3/4)

- The C_2O matrix for a poorly textured image :
- The C_2O matrix for a more textured image :
- The C_2O matrix for a more textured and colored image :

FIGURE: Image to characterize

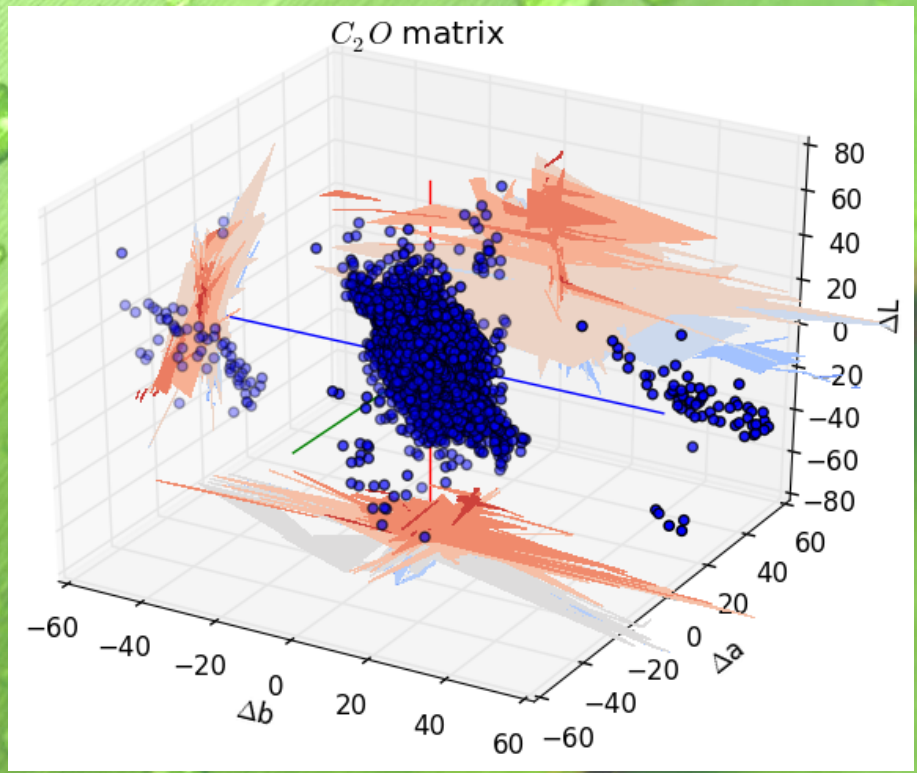

FIGURE: Signature

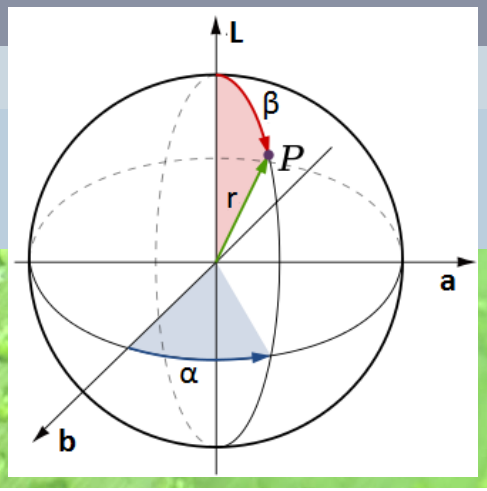
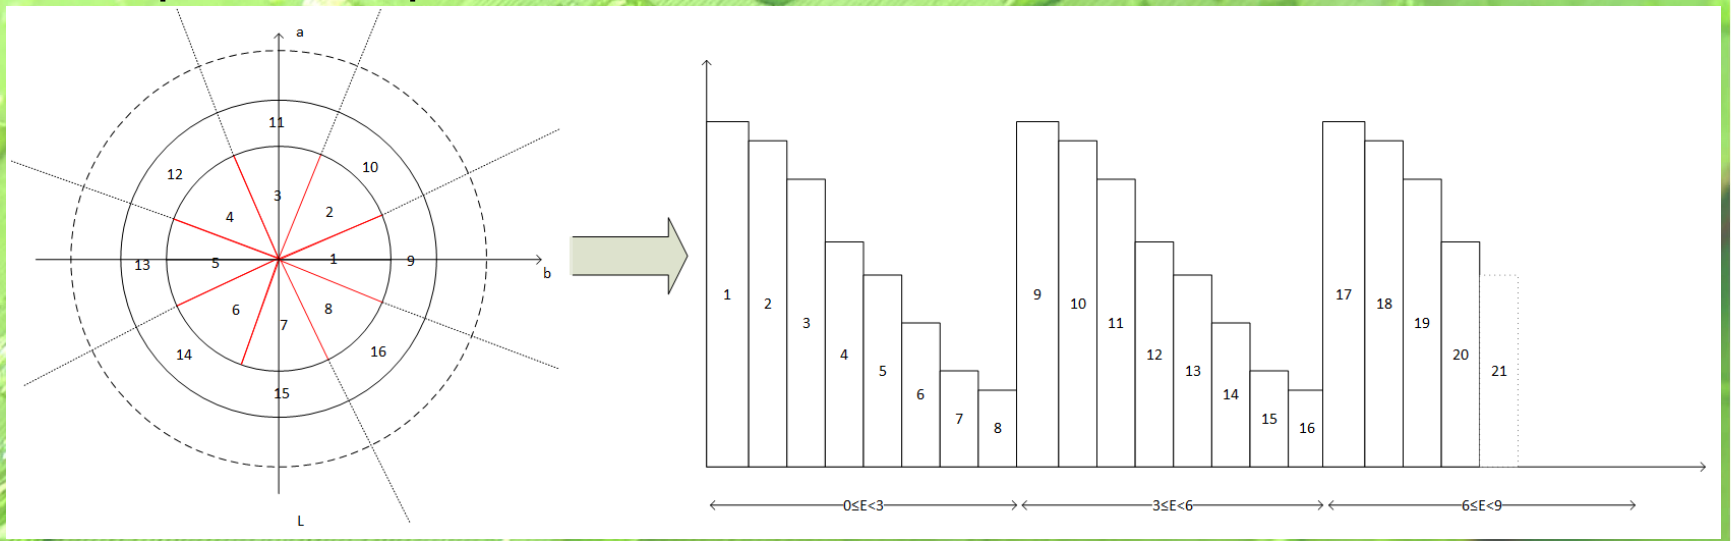
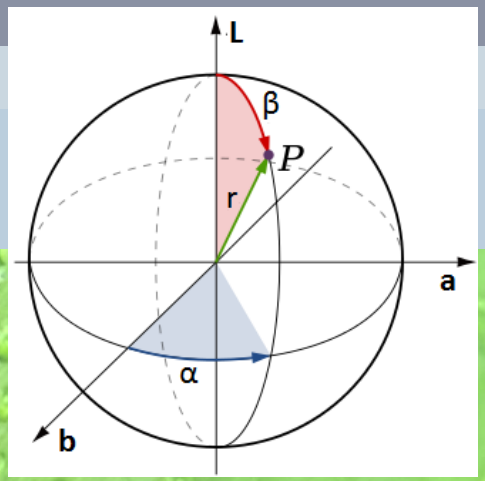
C_2O (4/4)



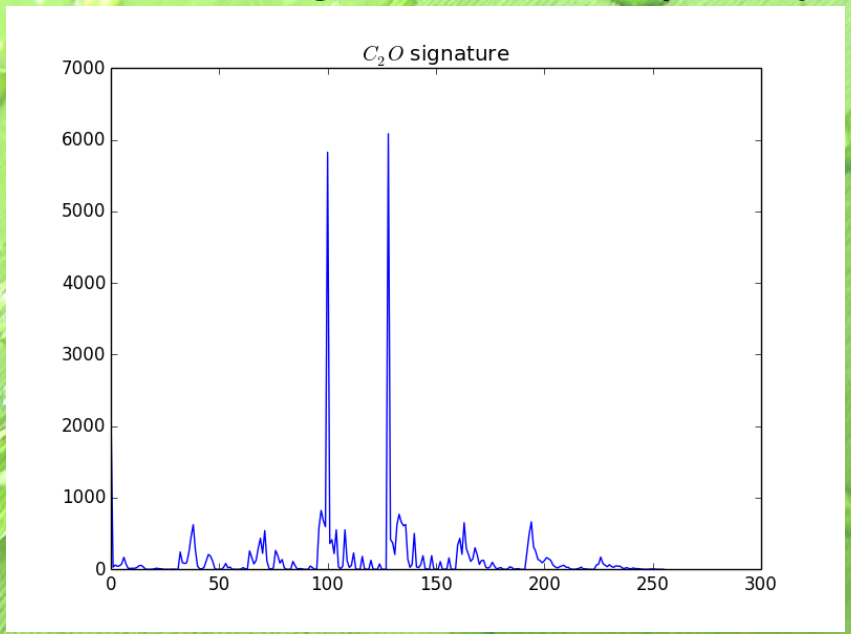
- The spherical quantization :



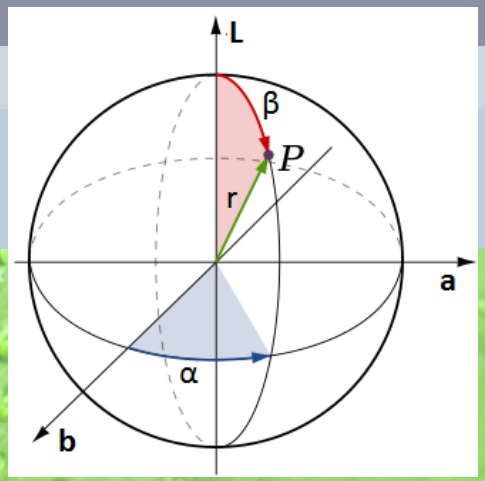
C_2O (4/4)



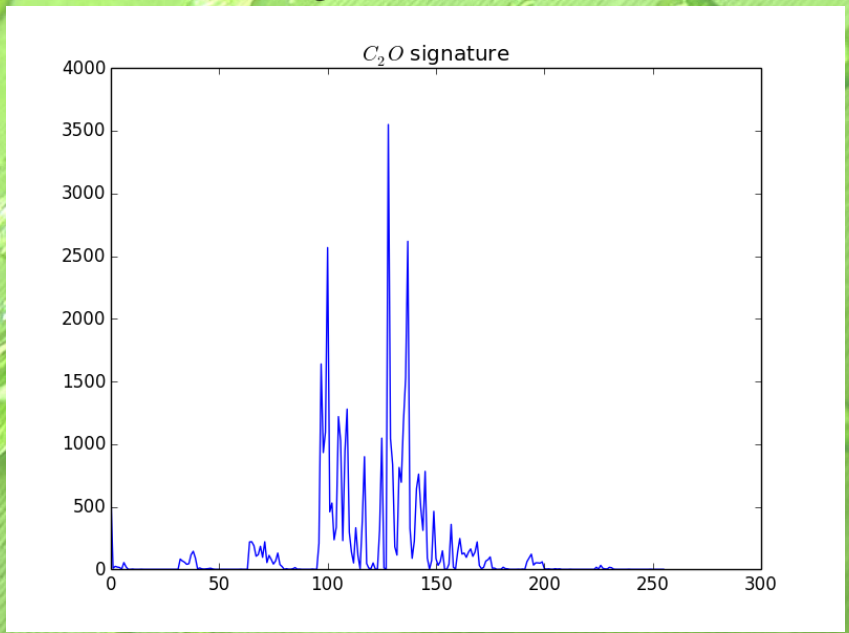
- The spherical quantization :
- The C_2O signature for a poorly textured image :



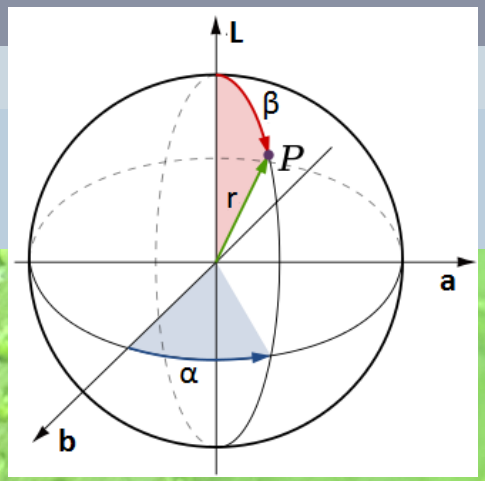
C_2O (4/4)



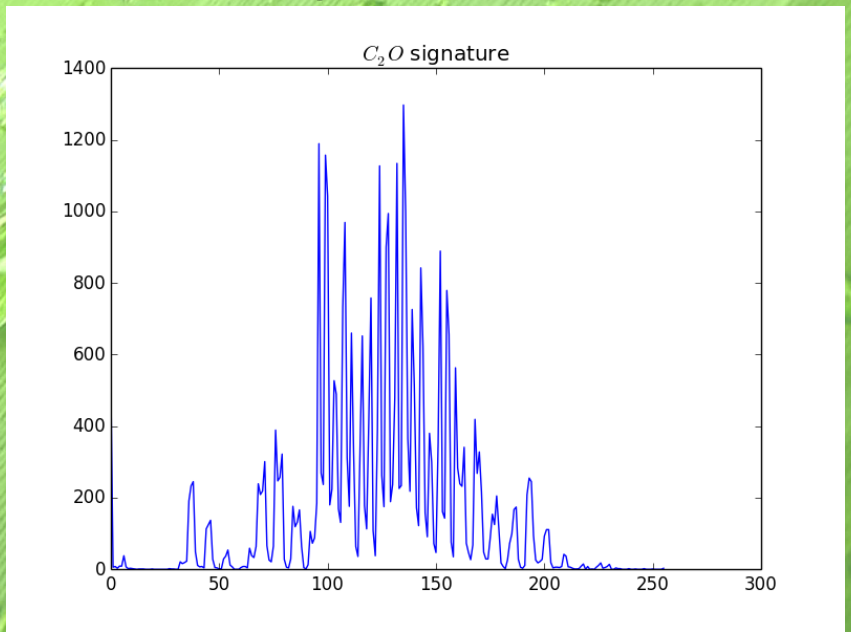
- The spherical quantization :
- The C_2O signature for a poorly textured image :
- The C_2O signature for a more textured image :



C_2O (4/4)



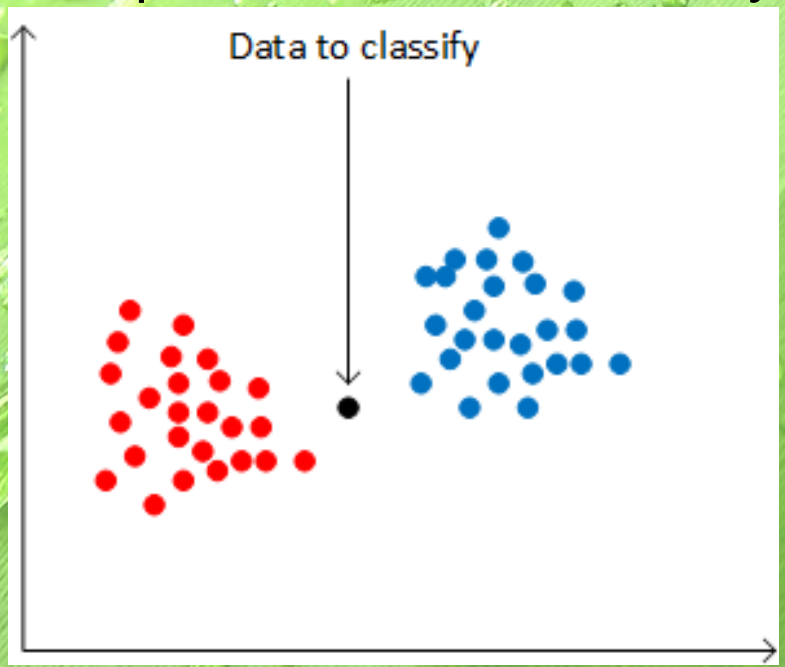
- The spherical quantization :
- The C_2O signature for a poorly textured image :
- The C_2O signature for a more textured image :
- The C_2O signature for a more textured and colored image :



Bag of word

K-nn(1/2)

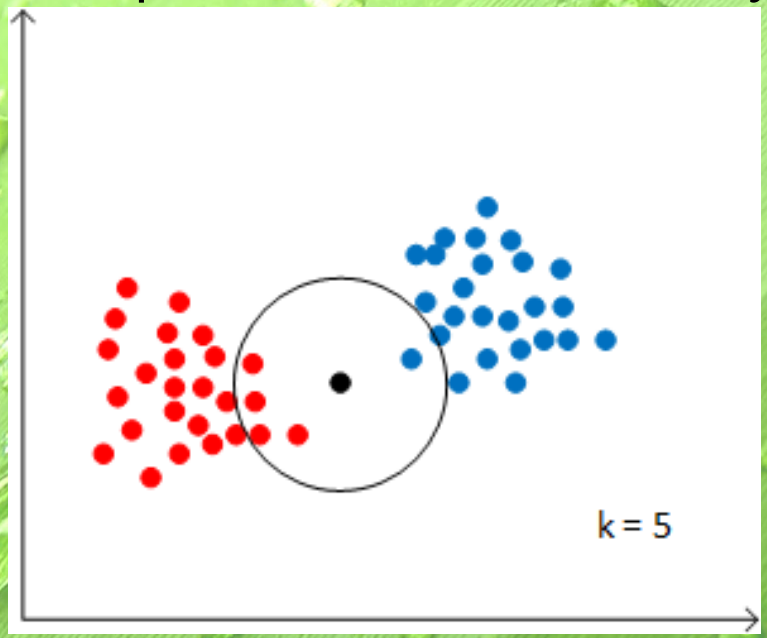
- The k nearest neighbor method
  - Comparison to the dictionary .



K-nn(1/2)

- The k nearest neighbor method

  - Comparison to the dictionary .



- 4 Occurrences of the ’red’ class , - 1 occurrence of the ’blue’ class
- The new point is attributed to the ’red’ class

K-nn(2/2)

- Application for image classification
  - More complex data.
  - Distances on signature vectors extracted from the K-mean method.
  - One most adapted distance type for each descriptor .

Result

Discussion

Outline

Scheduling (1/2)

- The previsional forecast Gantt chart :

ID	Task Name	Start	Finish	Duration
1	**Writing the state of the art**	27/04/2015	01/05/2015	1w
2	**Preparing the database**	01/05/2015	14/05/2015	2w
3	Constitution of database structure	01/05/2015	04/05/2015	2d
4	Calculation of SIFT discriptors	04/05/2015	08/05/2015	1w
5	Calculation of SURF discriptors	08/05/2015	14/05/2015	1w
6	**Programming**	14/05/2015	29/05/2015	2w 2d
7	Programming C2O descriptor calculation	14/05/2015	20/05/2015	1w
8	Programming the distance calculation function	20/05/2015	26/05/2015	1w
9	Writing of the technical documentation	26/05/2015	29/05/2015	4d
10	**Writing of the report**	29/05/2015	09/06/2015	1w 3d
11	**Preparation of the oral presentation**	09/06/2015	15/06/2015	1w

- All time affectation done before the beginning of the project
- Rarely respected in important project

Scheduling (2/2)

- The project backlog :

SPRINT EN COURS	5	BACKLOG PRODUIT								
Sprin	Catégorie	Sous catégorie	Nom / Description	Importance	Estimation	Critères de Vérification	Acteur	Status	Notes	Bug
5	Dev Logiciel	Test	C2o - HULK	75	??			A faire		
5	Dev Logiciel	Test	SIFT - calcul sur HULK	75	1,5		Ibrahima	A faire	Présent sprint 2	
5	Dev Logiciel	Recherche documentaire...	classification - doc	55	2			A faire		
5	Dev Logiciel	Redaction documentation	CLEF metrics - doc	65	0,5	presentation équipe scientifique	Thomas	A faire		
5	Dev Logiciel	Redaction documentation	documentation sur le processus "complet"	60	1	présentation à l'ensemble des acteurs du projet		A faire		
5	Dev Logiciel	Redaction documentation	SIFT - doc	50	0,5	presentation équipe scientifique		A faire		
5	Présentation		Présentation - ecriture	40	2	presentation équipe scientifique		A faire		
5	Rapport		Ecriture du document final - synthèse des docs	40	2	presentation équipe scientifique		A faire		
5	Présentation		Présentation - préparation	30	2	présentation à l'équipe pédagogique		A faire		
5	Dev Logiciel		Procedure de validation	60	2					
5	Dev Logiciel	Redaction documentation	Analyse des résultats	75	2			A faire		
Total					15,5					0

- Allow to change the affectation of a task
- Weekly time affectation : could be adapted to unforeseen

Our experience

- Minimal lack of time
- The possibility of changing task affectation is really useful
- An adaptation of the initial schedule has been realised
